Adding on to my existing dental practice was a dream that the Langley's helped me achieve. There were many challenging aspects of the project, including connecting the new building to the existing building while we were seeing patients. The Langley's made sure this happened seamlessly. Ricky, Ann, Wade and Nicole listened to my concerns and worked closely with me to make sure I was informed and comfortable with the entire process. They made themselves available, and I was always able to find them at their office or with one phone call.

I watched Ricky and Wade work with contractors as they built my office. They made sure to keep their contractors on track, and I was amazed at how quickly the process went. I know that they expect top notch workmanship from all of their contractors and will not hesitate to have things redone if necessary. There were several items that Wade insisted on replacing or redoing that I hadn't even noticed. They have also been present after the construction was completed to make sure I am happy operating in my new space.

Ann and Nicole were instrumental in helping me with the esthetics of the office. When I was unsure about certain material and color choices they offered guidance. They have many samples to look at right in their office which prevents you from having to travel to different locations to make selections. They utilize pictures from numerous finished projects to help you visualize different options.

The qualities that most impress me about Ricky, Ann, Wade and Nicole are their honesty and integrity. Without hesitation I can say that the Langley's are genuine people with a strong work ethic. They take pride in their work and want to do what is right for their customers.

The Langley's have established themselves as one of the top home builders in this area, and I am extremely happy that I used them for my project. I invite anyone who may be reading this to come by my office and look at the beautiful space the Langley's built for me.
